- 3) 10:25 – 11:00 – Updates on technical work - all
  - a. Status of EPA rule, guidance and modeling (see attached list of sectors modeled)
  - b. Planned activities and timeframes for other RPO/MJO work
    1. OTC/MANE-VU – technical work for states to opt for submittal in July 2018; starting consultation process (see attached)
    2. SESARM – anticipate working from EPA’s 2011/2028 modeling platform
    3. LADCO – may do PSAT runs – possibly separate source categories and states contributions (probably start with EPA’s 2011/2023 modeling platform)
    4. WESTAR – estimated funding need at \$1.5 million for technical work (target completion Dec. 2019). Looking at 2014 as base year (see attached)
  - c. CenSARA states technical work
    1. Draft timeline for SIP submittals (see attached)
    2. Control measure analyses needed? For SO2 only?
    3. Funding
    4. Document repository at [www.censara.org](http://www.censara.org) (under Committees pull down menu)
- 4) 11:00 – 11:30 - Tentative December 5 – 6<sup>th</sup> Denver meeting – purpose and participants
  - a. Potential topics/questions for the agenda
    1. Analysis of IMPROVE data – who, what, when and how
    2. Base year – how can use of different years be coordinated in technical work with other states/regions
    3. Sources -
      1. if 80% of categories for 4-factor analysis is not set in stone, what will be process to understand when/what is sufficient?
      2. Uncontrollable sources
    4. What does “flexibility” in rule really mean when establishing URP and RPG - ex: 95% for historic days or different percent; EPA’s methodology for establishing URP vs. others
    5. Communication and Consultation processes
    6. Other?
- 5) 11:30 – 11:45 - Other projects to track
  - a. Electric Power Research Institute (EPRI) project on international transport (see attached)
  - b. AER cloud-based air quality system (see attached)
  - c. Others?
- 6) 11:45 – noon - Next steps
